Sydney	3.78	1.62	2.48	2.79
Toronto	3.73	1.68	2.48	2.46
Vancouver	3.67	1.40	2.51	3.37
Total	3.67	1.68	2.51	3.02

💡 Key Insights

- Overall route acceptance is **59.12%**.
- **Toll-Free: 64.60%** vs **Toll: 47.86%** → **+16.74 pp** gap.
- Acceptance declines as **traffic uncertainty increases**.
- **Fastest** has the highest route-type acceptance at **60.10%**; Toll-Free route type is **57.03%**.
- Average ETA error is **+3.02 min**, indicating actual trips run longer than recommended ETA on average.

Acceptance & Completion by Preferred Route Type

Acceptance & Completion by Preferred Route Type

Sessions per User by Subscription Type & User Type

Key Insights

- Engagement grows from **DAU → WAU → MAU**.
- **D14 retention: 23.49%**, but needs validation.
- Retention varies across **signup cohorts**.
- User segments show different **engagement patterns**.
- **Returning** users show **stronger** repeat engagement patterns.
- Preferred route type **influences acceptance** and **completion patterns**.

Experiment Decision: RE-RUN CLEAN EXPERIMENT

Treatment shows promising improvements in route acceptance (+7.56 pp), navigation completion (+6.77 pp), and 7-day retention (+6.32 pp).

However, experiment validity is compromised by:

- 7,832 users appearing in both groups.
- 10,212 users having multiple exposures.
- An unusually long 724-day exposure period.

Recommendation: Run a new experiment with stable user-level assignment, no cross-group contamination, and a predefined experiment duration before making a rollout decision.
